Getting Started

In order to use the API, you need a MTLS certificate. These are provided to you by SIX.

Please check the steps described here on how to use the certificates to request the APIs from the API portal - [API Portal - Documentation](#)

The steps to use the APIs from Postman are here - [API Portal - Documentation](#)

Sample Python Code to request the APIs - [API Portal - Documentation](#)

APIs Available

The list of APIs Available can be found in the API Catalog - [API Portal - Catalog](#) (Use the Web API filter to filter on the Web APIs)

Below are few APIs that can help you get started

API	Description	Entities	Example Request	Portal Page
Free Text Search	Starting point to search for Instruments	Instruments, Entities, Markets	https://api.six-group.com/web/v2/search/freeTextSearch/instruments?text=Apple&size=5&preferredLanguage=EN&instrumentType=EQUITY	API Portal - Free Text Search
Instrument Base	REST API for basic Instrument data	Instruments	https://api.six-group.com/web/v2/instruments/referenceData/instrumentMarkets?scheme=VALOR&ids=114621&listingCurrency=USD&marketCountry=US	API Portal - Instrument Base
Instrument Markets	Helps in finding the BC code for a Instrument	Instruments	https://api.six-group.com/web/v2/instruments/referenceData/instrumentMarkets?scheme=VALOR&ids=114621&listingCurrency=USD&marketCountry=US	API Portal - Instrument Markets
Intraday Snapshot	Intraday Prices for selected stocks	Listings	https://api.six-group.com/web/v2/listings/marketData/intradaySnapshot?scheme=VALOR_BC&ids=114621_65&preferredLanguage=EN	API Portal - Intraday Snapshot

GraphQL Interface

All APIs also have a GraphQL interface where you can pick and chose the fields. You can find the examples in the GraphQL playground page in the portal - [API Portal - GraphQL Explorer](#)

Additional documentation on GraphQL and sample programs - [API Portal - Documentation](#)

API Data Model & Troubleshooting

This page explains how the APIs are structured and the inputs required - [API Portal - Documentation](#)

For basic troubleshooting and errors with authentication, please refer to this page - [API Portal - Documentation](#)

List of error codes and potential mitigation steps are described here - [API Portal - Documentation](#)

Data Dictionary

For every API, the list of fields that are available are described in the 'Content' tab of the respective APIs.

For full list of fields that are available and their descriptions, you can refer to the data dictionary page - [API Portal - Data Dictionary](#)

Entitlements of Hackathon Accounts

As the accounts are created specifically for hackathon, you will not have entitlements for a lot of data. Please use the search API to find the identifiers.

Below table has some of the markets and sample instruments that you have access to:

Market (BC)	Instruments (VALORs)	Name
NYSE BC = 65	114621	Coca-cola
	138405792	Blackrock
	135092601	M&T Bank
	959184	Oracle
Forex Calculated Rates BC = 149	946681	EUR/USD
	275164	CHF/USD
	968880	CHF/EUR
	275017	GBP/USD
NASDAQ (End-of-Day) BC = 67	908440	Apple
	951692	Microsoft
	984101	Walmart
	941595	Intel
NASDAQ Copenhagen (End-of-Day) BC = 12	129508879	Novo Nord
	1150721	Danske Bank
	461893	Carlsberg
	40543008	Nordea

Streaming Market Data

Streaming Market Data is a Web Socket API for streaming prices in real time and delayed

API Page	API Portal - Streaming Market Data
Web Socket Client (HTML)	API Portal - Documentation

Inspiration

You can look the below sites to understand what can be created with the APIs:

[Regalia Wealth](#)

[International bonds: Apple, 2% 17sep2027, EUR \(FIGI BBG009ZY6R65, XS1292389415, WKN A1Z6UF\)](#)

[Krypto ETP – Guide für digitale Anlagen | CoinShares ETP](#)
